

The DOCTOR

Verse 1

I decided to be a doctor
When I was young and dumb
To help others in need
And infuse their bodies with love

Verse 2

In training my smile was eager
Days were long but the years were short
Kept my white coat clean
Did my best to hold down the fort

Chorus

As the doctor (female vocals)

I played the hero despite
The clots and failures
Worked all thru the night
Gifting hope and light

I honestly always tried
To do my best
'Til the patient's eyes
Told me they were fine

I always wanted to be a doctor!

Verse 3

Removing tumors hits the spot
Don't try to hurt except when
The pain comes back and
I have to do it all again

Verse 4

I escort people into white
Lights and then back out
But I'm clueless on how
To prevent my own burnout

Chorus 2

As the doctor (female vocals)

I played the hero despite
The clots and failures
Worked all thru the night
Gifting hope and light

I honestly always tried
To do my best
'Til the patient's eyes
Told me they were fine

I always wanted to be a doctor!

Bridge

As a doctor it's not easy no one,
Gets what it's like,
Gets what it's like to hold a loaded gun

Chorus 3

As the doctor (female vocals)

I played the hero despite
The clots and failures
Worked all thru the night
Gifting hope and light

I honestly always tried
To do my best

'Til the patient's eyes
Told me they were fine

I always wanted to be a doctor!

Verse 5

Not until the last case of the day is done
Do I feel the day's sting
Being so close to death changes
Both nothing and everything

End

It turns out us doctors
Need hope too
I might be a doctor
But I survive on your love too
