

Bikini

I've never worn a bikini, but I've seen some that look nice,
I should look only once but confess I do look twice.
Introduced in France in the summer of 1946,
The fashion industry turned up-side-down, opinions were split.

What started as a scandal soon became the norm,
As everyday people decided they should be worn.
Now they're found on beaches in cities both big and small,
Even babies wear them, though they're only two feet tall.

So, when you're at the beach with bikinis are all around,
If you're a married man, go look for shells with your eyes looking down.
Occasionally when you don't find the shell you seek,
You'll probably find yourself looking up to have a tiny peek.

A peek may not mean much trouble, but a stare will ruin your day,
The next time you get to the beach they might not let you stay.
That's the trouble with bikinis that make women look so great,
It leads to accusations and denials that will usually seal your fate.
