

Billy Joel

“The Piano Man,” Billy Joel is as popular as ever,
Packing crowds with his musical endeavors.
Filling up Madison Square Garden with each show,
At age 65, he still has that smooth energy and flow.

His music is timeless, not following popular trends,
An incredible musician whose good music never ends.

Writing music to which we all can relate,
Making his music perfect for any first date.

He wrote about love, but personally struggled to understand,
Three failed marriages made him like any other man.

A sad man who turned to drugs in despair,
But overcame so much and makes us all care.

His songs like “Honesty,” “The Longest Time,” “Piano Man,”
And many others landed him in Rock’s Hall of Fame and on David Letterman.

A super skilled musician, and 80s legend for sure,
When you need a “happy fix,” he is still surely the cure.
