

EDM

Electronic Dance Music has made it into almost every club.
It's repetitive rhythms and synthesized sounds are what dancers love.

EDM is not meant to replace Pop, Rock, or Jazz,
But when you're dancing through the night it's definitely Badazzz.

The music moves you, making it hard to sit by and watch,
Soon you're on the floor cutting the perfect swatch. (old school for tearing it up)
Clubbers can feel comfortable no matter where they take their game,
Though lyrics and notes are different, the rhythm always stays the same.

Slow dancing's a lost art, we lost it back in the 60's,
Rock and rolling all night long, lost steam after the 90's
Night clubs don't want fans to just be scatterbrained,
It's a true participation sport, and EDM keeps you entertained.
