

My Tesla

My Tesla puts other cars to shame,
Emission free, it lives up to its name.
Saving me money on oil and gas,
My Tesla is sick and pretty damn fast.

Not only does it save me money by not wasting fuel,
It's saving the environment, now that's pretty freakin' cool.
My battery lasts longer, but my acceleration is greater,
Then can ever be imagined by any Tesla hater.

Leaving ancient fossil fuels and unhealthy pollution behind,
I'm doing my part to build a better future for others to find.
So, don't knock it till you've tried it, you may be simply amazed,
By the TLC, speed, cleaner air, and all the money you will save.
