

# Popcorn - A Magical Kernel of Nothingness

An amazing snack known as popcorn,  
For it's literally full of hot air.  
Adding butter, salt, or caramel,  
It's a snack you can take anywhere.

Going to movies would not be the same,  
Where the glorious scent draws everyone in.  
And going to a ballgame without it,  
Would be like going without your best friend.

Popcorn may be cooked on a stove-top,  
Or mixed with sweetness in a kettle.  
But now there are hundreds of microwave kinds,  
You may eat without making a deal with the devil!

Low in calories,  
While high in fiber.  
It's even perfect  
For an all-nighter.

So, consider popcorn  
For your next "snack attack."  
It's a special treat,  
That won't ever fight back.
