

What is in a Hole?

Can a hole be filled with anything,
And still be called a hole?

For once it's filled with something,
A hole is no longer its sole goal.

By logical definition,
A hole should always remain empty.
Sometimes I'll change their meaning,
By filling in what's there to tempt me.

Putting cement in a hole,
It becomes a footer or a foundation.

If you put water in a hole,
It becomes a lake to take vacations.

Plant enough seeds in a large hole,
And it becomes a green valley.

Making a hole in your boat's deck,
Will give that boat a galley.

So be careful what you call a hole,
For it's easy to change its name.

And a hole filled with rocks,
Is certainly not the same.
