

World Series

The World Series is a summer game that's played in late fall,
A culmination of "America's game," that is truly loved by all.
Enjoyed by those brave enough to be outside this late in the year,
Or, lucky enough to be able to sleep in, so you can stay up late to cheer.

It may not have the shiny luster like in years of the past,
Like when the Cubbies finally won it all, now that was a blast.
But it is still an interesting sport with nine players on each side,
Each making more money than college professors far and wide.

And to hit a cold ball travelling at over ninety miles an hour,
Over a fence more than a football field away with that necessary power,
Is an incredibly unique skill that very few can ever possess,
An accomplishment that proves these baseball players are up to any test.
